Sustainability Reporting and Corporate Social Responsibility		Webinar on 'CSR the New Corporate Essential'	To create awareness regarding the CSR structure in India and its implications	The participants got an insight into CSR in India and its relationship with sustainability	
Sustainable Habitat Concept and Practices		Webinar cum Panel discussion on 'Development of Solar Energy in India' in collaboration of NISE, MNRE and Rotomag	To create awareness regarding the status and challenges associated with solar energy in India	The participants got an insight into the solar schemes and its application in rural parts of India	
Policies and Practices for Sustainable Development					
Product Design and Development		Webinar cum discussion on 'Green Energy'	To create awareness about the importance of green energy for the country	Participants got an insight into the relationship among environment, energy and development, and the importance of renewable energy for India	
Capacity Building for Sustainable Development		14th Annual Symposium on Capacity Building For Clean Energy	To built capacities about clean energy	The participants got an insight into the green energies and and its application in India	
Resource Management		Webinar: Documentation (File editing, compression and Conversion) in collaboration with 361 DigiAds	To develop basic skills for MS word and Excel to make online learning easier	Students learned various methods of file compilation, compressing and changing file format. Participants learned benefits of composting at home and how wet waste can be prevented from going into landfill	
Facilities and Service Management	Webinar on Composting Cost effective alternative for Home	To learn method of composting wet waste at home	Participants learned benefits of composting at home and how wet waste can be prevented from going into landfill		
Resources and Sustainable Development	Plant a sapling drive as part of Sustainability Week' 21 in collaboration with Prem Jain Memorial Trust	To plant a sapling, at a location / place of your choice	Participants across the country got involved in tree planting activity		
RESOURCE Management & Design Applications (RMDA)	Enterprise Design and Management	1. Webinar on - Marketing 2.0: Digital Disruption 2. Webinar on -Entrepreneurship: Opportunities and nuances in the contemporary scenario	1. To create awareness about digital landscape in India, purchase behavior and digital marketing 2. To create awareness about Entrepreneurship as a career option and other opportunities for students	1. The participants got an insight into how internet has changed us as consumers and its impact on marketing 2. The participants learnt opportunities and nuances in the field of Entrepreneurship with respect to the current pandemic scenario.	
	Health and Safety in Built Environment	Webinar on Importance of maintaining Indoor Air Quality and Ventilation in Covid 19 Pandemic in collaboration with Indian Pollution Control Association	To generate awareness amongst students about maintaining indoor air quality	The participants learnt about the Indoor air quality and how to maintain it during the global pandemic.	
	Climate Change and Ecosystem: Issues and Concerns	Green Virtual Run as part of Sustainability Week' 21 in collaboration with Prem Jain Memorial Trust	A virtual Marathon to reach a designated goal of finishing a specified distance by running or walking or cycling at a time and location of participants' choice	Participants across the country participated in the virtual run, making the green marathon a success. The big difference was that participants could run this race from anywhere, with anyone, and at any time of the day.	
		Green Mask Making Competition as part of Sustainability Week' 21 in collaboration with Prem Jain Memorial Trust	To capture the imagination and creativity of design enthusiasts, both professional and amateur, who are keen to make a difference and help the environment by designing a Sustainable Mask. This was an attempt to create awareness about sustainable materials.	Participants came up with unique, green and sustainable mask designs using innovative materials and methods	
		Hashtag Making Competition as part of Sustainability Week' 21 in collaboration with Prem Jain Memorial Trust	To make an original, creative and trend worthy hashtag related to environment and sustainability and share it with maximum people	Participants were able to create some really innovative and original hashtags attracting immense attention on social media, generating environmental awareness	
	FABRIC & Apparel Sciences (FAS)	Indian Textile Heritage	Webinar on Consciously Traditional: Let's be Vocal for our Local heritage	To create awareness among students about our rich traditional textile heritage	The webinar was well received by the participants with a majority expressing their appreciation for the knowledge shared by Ms. Yogita Singh from Medworld Educational Society, Mr. Bijay Kumar Bharti from Weaver Development and Research Organization & Sh. Neelambar Deevanga (National Awardee Weaver).
		Indian Textile Heritage	Webinar on Heritage Textiles: Documentation and its Challenges	To understand the challenges faced by museum curators while documenting and conserving heritage textiles in Museums.	The content shared enabled students to get a practical insight on the various challenges faced by the museum curators and textile conserves in textile craft documentation and preservation.
		Fabric and Apparel Science	Webinar on 'Intellectual Property Rights (IPR)	To create public awareness about the benefits of Intellectual property among all sections of society	Participants gained an understanding of Intellectual Property rights and various issues related to it.
		Sustainable Fashion	Workshop on GHG Accounting and Reporting	To acquaint the students with usefulness and methodology of calculating GHG emissions	Students were able to learn the process of GHG Accounting and Reporting successfully. They were able to understand the process of analysing the carbon footprint by quantifying the total amount of greenhouse gases the organization produces.
		Textile Design and Development	Webinar on Design Development Process	To understand the process of Design development followed at the industry level.	Students were able to gain an understanding of design development process and they were able to gain practical knowledge beyond the classrooms.
		Fabric and Apparel Science	Session on Mindfulness and Art Therapy	To reinforce mindfulness as an important area of personal and professional growth	The session helped the students to learn mindful practices for stress relieving.

	Textile Conservation	Sustainable Practices in Textile Conservation	To gain an understanding of the environmental sustainability practices adopted in textile conservation	Participants were able to understand re-using and recycling to more complex topics such as Life Cycle Assessment and green solvents.
Bachelor of Education (B. Ed.)	Pedagogy of Science	An online workshop cum webinar on the topic "Making Things, Doing Science"	The objective was to equip and empower the students to create environment friendly, low-cost teaching-learning material from the daily life, waste objects. The webinar turned out to be very effective in terms of generation of new learning and eco-friendly creative ideas by students and teachers both.	Students were able to gain insight and constructed low cost teaching learning resource material
	Conceptual Foundation of Education	Organized an online webinar on the topic "Education: Classrooms and Beyond"	To build personal and social skills among student teachers.	Participant were able to understand the personal and social skills usage beyond the classrooms
	Conceptual Foundation of Education & EPC : Yoga	Conducted an online webinar on the topic "How to lead a Balanced and Successful Life?"	To acquaint students to face the challenges especially of COVID -19 in a positive manner	Student teacher were able to understand the importance of positivity in life especially during challenges
	Pedagogy of Science , Home Science , EPC : ICT & The Inclusive School	Teaching Science through ICT in Inclusive Set up	To gain insight of online science resources which can be used in pedagogy practices so as to make classroom inclusive	Students were able to use open educational resorces in constructively in teaching learning process
	Education in Contemporary India	Reflection on Intergenerational bonding and NEP 2020 based on the webinar "COVID-19: Youngest to Oldest"	To gain understanding of NEP 2020 in context to COVID -19	Students were able to discuss
	Pedagogy of Science	Webinar on 'Perspectives in Science Education'	To gain expertise and experience about innovative science teaching and learning methodologies, through on-site and on-line presentations, and social events.	Participants were able to discuss and demonstrate different perspectives that can be used in teaching learning process
	Pedagogy of Science	A webinar on 'Ethics in Science'	To gain an understanding of environmental ethics to protect natural entities, and the sustainable use of natural resources.	The webinar turned out to be very effective and interactive with students sharing their own understanding and asking various questions about multiple debates related to Ethics, Science and Society
	Pedagogy of Home Science	Workshop on making Potli bag and Cloth folder	To gain insight of developing articles using sustainable practices	Student teacher were able to construct articles using sustainable practice
	School Experience Programme -I (SEP -I), EPC : Art & Aesthetics	Virtual tour to National Gallery of Modern Art	To develop communication and language skills and also to appreciate art and aesthetics	Students were able to appreciate the rich culture and heritage and also how it can be used in teaching learning experience
	Pedagogy of Science, Home Science & EPC :ICT	Organized an online webinar on the topic "Open Educational Resources".	To gain insight of open educational resources which can be used in pedagogy practices so as to make classroom inclusive	Students were able to use open educational resorces in constructively in teaching learning process
Food & Nutrition (FN) & Food Technology (FT)	Pedagogy of Science, Home Science , EPC :ICT, Assessment for Learning	Nation E – Webinar on ICT in Teaching Learning: Content Development and Assessment	To gain expertise of using ICT for Assessment besides teaching learning process	Students were able to use open educational resorces in constructively in teaching learning process
	Public health Nutrition	webinar on 'Dietary Diversification: Imperative for Attaining	To develop insight of the concepts of diet diversification	Understand the concept of diet diversification for good health
	Food technology	webinar on Anti-ageing realm-Tapping molecular mechanisms	To understand the difference between life span and health span, latest n	Understand the concept of molecular mechanisms to develop nutraceuticals
	Food Science	webinar on 'Innovations in Food and Dairy Business': Oppo	To have the insight of different opportunities in the field of dairy and food	Understands and gain knowledge about the role of food technologist in dairy and food industries and innovative roles in the same.
	Food technology	webinar on 'Packaging of Food: Trends and Prospects'	To understand the trends and prospects in food packaging	Understands the types of packaging materials used in Food Industry and its advantages and disadvantages
	Food technology	webinar on 'Scope of Food Technology in Emerging Industri	To have the insight of newly emerging industries whereby food technolog	Understand the different roles of food technologist in different upcoming and existing food industries
	Institutional Food Management	webinar on Electronic Diet Management in Hospitals'	- To develop an insight about the work flow in hospital kitchen - To comprehend the role of dietician in Food Service Management at H	- Understanding the various operations involved in Food service management of hospitalized patients - Understanding the current practices followed at the Hospital Kitchen for effective nutrition management
	Advanced Human Nutrition	webinar on Nutrition Requirements in extreme climatic cond	To develop an insight about the modifications in nutrient requirements u	Understanding the nutritional needs under extreme climatic conditions
	Medical Nutrition Therapy	Webinar on Identification and Management of Severe Acute	To identify Severe Acute malnutrition in children, To understand the man	Understanding the management of children suffering from Severe Acute Malnutrition
	Medical Nutrition Therapy	webinar on Nutritional Management of COVID 19 Patients a	To develop knowledge about nutrition aspects of current pandemic	Understanding the medical nutrition therapy for COVID19
	Public health Nutrition	webinar on Informatics: Relevance and Research Scope in Pu	To understand the role of informatics in the field of public health and nutr	- Understanding the importance of informatics in research -Learning application of informatics in the field of public health and nutrition
	Public health Nutrition	webinar on Food & Nutrition Challenges Faced by Indigenou	To identify challenges related to food and nutrition during covid crisis	understand food and nutrition problems of different communities
	Therapeutic Nutrition	webinar on "Role of Quality Indicators to Improve Nutrition Care Process"	How to document nutrition care process. Why do it- The importance of process documentation. How to document nutrition quality indicator. How to measure nutrition quality parameters. Digitization & Quality parameters.	Understand the importance of nutrition care process and nutrition quality parameters.
	Public health Nutrition	webinar on Webinar for Frontline Workers under MWCD' on plants and demonstration of low cost recipes for first 1000 d	• Best practices of Horticulture in Lady Irwin College. • Nutritional requirements during first 1000 days. • Supplementation in First 1000 days. • Demonstration of Low cost recipes for first 1000 days.	An addition to the Knowledge base of frontline workers and has induced critical thinking and innovative approach to nurturing kitchen gardens and cooking with low cost ingredients.
	Therapeutic Nutrition	Gestational Diabetes Mellitus- Current Perceptives and Chall	To understand the current perspectives and challenges in Gestational Di	Gain knowledge about screening of GDM, Antenatal Management of Pregnant woman with GDM. Care in postpartum and follow up
Therapeutic Nutrition	Challenges In Facility Based Care Management Of Children With Severe Acute Malnutrition	To identify Severe Acute malnutrition in children, To understand the man	Identifying children with severe acute malnutrition, Nutritional management of children with severe acute malnutrition	
Food technology	webinar on Traceability and Recall in Foods'	To control food hazards and highlight the best preventive measures	Understanding the traceability and recall in food chain to control any hazard	
Food technology	webinar on 'Green Perspectives in Food Processing'	To understand the application of Green Technology in food sector	Understand the application of Green Technology in food sector to reduce energy, environmental foot print, process-induced toxins in foods, waste generation, alternative and sustainable process for analytical and processing.	
Food technology	webinar on 'Novel Technologies for Sustainable Food System	To understand the emerging technologies for a sustainable food product	Understanding the sustainable food production using Novel Technologies	
Medical Nutrition Therapy	webinar on 'Nutritional Management of Cancer in Children'	To understand the nutritional management of children with cancer.	Understand role of nutrition in cancer and Dietary Management of Severely malnourished children with Hodgkin's Lymphoma through case study presentation.	
Therapeutic Nutrition	Webinar on "Diet Assessment Software"	To understand the basics of diet software	Understand the importance of software for the assessment of diet, first hand experience on all the tabs of Diet cal for research purposes both at facility and community level.	
Sports Nutrition	webinar on 'Nutritional Support for Children and Adolescent	To develop knowledge about nutrition aspects of current pandemic	Understanding the nutritional needs, hydration and eating disorders among children in sports.	
Therapeutic Nutrition	Identification and Management of Severe Acute Malnutrition	to understand the nutritional management of SAM patients	Comprehending the concept of medical nutrition therapy of SAM	
Food technology	Advances in the Processing of Fermented Dairy Products	To understand the recent advances in fermented dairy products	Understanding the advanced technologies in the processing of fermented dairy products	
soft skills	Webinar on Resume Writing and Excelling Job Interviews	To enhance skill development in resume writing. Tips to overcome stress during interview session and about good body Tips for tackling unwanted questions and smart presentation of yourself	The course was well received by the participants with a majority expressing their appreciation for the knowledge shared by Ms. Deepthi.
